

IZI-Link USB Programmer Interface

The **IZI-Link USB Programmer Interface** is a multifunctional DIN-rail module with which an IZI-Link system can be commissioned.

The interface is equipped with a USB connection so that it can easily be connected to a Windows PC.

With the special commissioning tool **IZI-Manager**, an IZI-Link system can be configured easily and remotely.

The IZI-Link USB interface offers configurable functionality such as programmable DMX-512 Fail and various Dry-input contact modes.

Features

Remote configuration
With IZI-Manager Software

Stand alone
Dry-contact input

DMX Fail
Different options available

Technical specifications

Power	Input voltage: Current input max: Power consumption:	48VDC 150mA 3.6 Watt max.
Control	Control input: Control output: Windows PC connection: Dry contact inputs:	1 x DMX-512 galvanically isolated 1 x DMX-512 USB Connector 4 galvanically isolated
Miscellaneous	Housing: Input connector: Power input connector: DMX in- & output connector: Dry contact inputs connector: Certifications:	Desktop ABS plastic DIN-rail (3 module width) Print connector 2-pole screw terminal, 2,5mm ² max. 4-pole terminal block, 1.5mm ² max. 5-pole terminal block, 1.5mm ² max. cMETus E114112

Connections

IZI-Link USB Programmer Interface

Contact Closures

The Contact Closures for the IZI-Link USB interface can be configured with the IZI-manager Software tool and a Mini USB cable.

Three contact closures can be programmed on set value's .

E.g.:

Contact 1 = 100%

Contact 2 = 66%

Contact 3 = 0%

Scene setting

The contact input for scene settings recalled a pre programmed setting. By default this setting is 0%

To program a scene setting, create a scene with a DMX controller on the input.

Hold the program switch for 2 seconds, until the LED indication turns green. This creates a snapshot of the DMX-512 input and store this as a scene.

LED indication

Identify mode

The Identify mode can be activated within the IZI-manager, identifies the selected module.

Test Mode

When the program switched is pressed once, all channels will output 100% (255)

Status	LED	Behaviour
Power ok, Data reception	Green	Blink
Power ok, No data	Red	On
Over temperature	Red	Blink
Low voltage	Red	Blink
Firmware update (IZI-manager)	Red	Blink
Identify / Test	Red / Green	Toggle

IZI-Link USB Programmer Interface

Factory default

Press the program switch for 4 seconds until the indication LED turns Red. Now the USB interface has been set to factory default.
